*The Hardware Kit is used in multiple models. Your Shear may not use all of the items listed.*

## ASSEMBLING YOUR SHEAR

Tools needed: #2 & #3 Phillips head screwdrivers, 1/2" socket or wrench.

### • **IMPORTANT** •

Start all screws **BY HAND**  
when assembling your shear.  
This will help avoid cross-threading.

Avoid cross-threading by using  
your fingers to start all screws

### 1. ATTACH RAILS

Attach rails to Power Assembly base using **Item A** screws.

### 2. ATTACH TAIL

Attach tail to rails using **Item C** screws.  
Make sure holes in tail are facing up.

## SET UP

### 3. ATTACH TABLE

A. Attach front of table to base,  
using **Item C** screws. Tighten  
with #3 Phillips.

B. Attach back of table to tail using  
**Item D** self tapping screws.  
Tighten with #2 Phillips.

# SET UP continued

## 4. TO ATTACH HANDLE:

Insert *Item E* bolts and tighten with 1/2" (13mm) wrench.

## 5. ATTACH ANGLE GUIDE

Install angle guide and tighten *Item F* thumbscrew.

# MAKING CUTS

**1** While gently pushing handle down, pull Safety Lock pin out, lift handle.

**2** Place product on table. Bring handle down until blade touches material.

**3** Push the handle down until the material is completely cut.

Your Magnum Shear cuts a wide variety of products. Please refer to cut guide for recommended products and thicknesses.

## CUT GUIDE

*Maximum Thickness = 1"*

Carpet Tile
Luxury Vinyl Tile
Commercial Vinyl Tile
VCT
Parquet
PVC Tile
Rubber Tile
Soft Plastic

Please note: Approved materials may vary in density and hardness. If extreme pressure is required to cut a product, it may result in damage to your machine. Please contact Bullet Tools before proceeding. Warranty is void if an unapproved product damages the machine.

## REPLACEMENT BLADE

26" MAGNUM™ Flooring Blade

#526B
