## DID YOU KNOW?

**EVER WONDER WHY THEY CALL IT A FROG?**

### BRICK TROWEL FROG

Did you ever wonder why the V-shaped transition zone from the post to the blade of a brick trowel is called a frog?

### FROG ON A HORSE'S HOOF

A frog is not only a tailless amphibian we see in ponds, but it is also a V-shaped structure located on the underside of a horse's hoof. The frog on a horse is typically dark gray in color. This frog serves as a shock absorber, as an aide to solid footing, and as a pump to move blood back to the horse's heart.
